

### **Temperature Measuring and Disinfection Machine**

All-in-one temperature measurement and disinfection machine is a new product bred out of the epidemic. As always, SuiYi insists on independent research and development and this soap dispenser was developed by SuiYi itself and enjoys exclusive patent rights. It automatically senses when your hand is near the, quickly measuring the temperature and also spraying

liquid to disinfect your hands to avoid cross-contamination.

#### **Product Description**

The soap dispenser has both spray alcohol and drip nozzles for a wide range of liquids. equipped with a large capacity 1,000 ml water tank which can be easily seen from the outside and can be refilled whenever needed.

#### **Product Parameter**

High precision infrared sensor, stable and reliable performance

With intelligent energy saving and automatic wake-up function, low energy consumption, more economical

Support battery USB interface dual power supply, greatly enrich the whole machine application scenarios

#### **Product Detail**

soap dispenser uses a non-contact method to automatically and quickly detect temperatures and display them in high definition on its screen, with voice announcements and temperature anomaly warnings. It is designed to be user-friendly and supports any conversion between Fahrenheit or Celsius temperature units. It also supports hand-free disinfection.

In addition to the two well-known functions of temperature measurement and disinfection, our temperature measurement and disinfection machines can also detect indoor temperature and humidity.

#### **Product Feature and Application**

soap dispenser is our product for measuring and displaying human body temperature, ambient temperature and humidity during an outbreak. Place your hand on the outlet and automatically discharges a hands-free liquid for disinfection and indicates if the body temperature is abnormal. It avoids cross contamination, is easy to install and is available in both desktop and floor standing versions. There is also a battery USB dual power mode,

making it easy for your customers to use in a variety of settings.

soap dispenser is a multi-functional automatic product that combines temperature measurement and sterilisation in one, easy to operate and widely used in public places such as school kindergartens, restaurant entrances, hospitals and clinics, administrative office halls, hotels, homestays, homes, shopping malls and other public places.
